

## Revised Text-Book of Geology (Paperback)

---

By James Dwight Dana

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1897 edition. Excerpt: .have exceeded 2500 F. The atmosphere must then have contained all the water of the globe, all the carbon (in the form of carbon dioxide) now stored in solid form as coal and other hydrocarbon compounds and as carbonates, and various other materials which have since formed solid compounds. When the ocean was first formed by condensation from the atmosphere, its temperature may have been as high as 500 F., the atmospheric pressure being still perhaps 30 times as great as at present. The chemical action of the ocean in rock destruction and rock formation must then have been very much more important than in later times. Long ages must have elapsed before the earth was cool enough to permit the existence of the lowest organisms. Archaean time must have been immensely long. ROCKS: KINDS AND DISTRIBUTION. 1. Distribution.--Since the Archaean era commenced with...
