There were 36 inches in the yard, and of course each inch was fa. They measured the twine, and found it 3 yards and, that is, 3/10 of a yard. They reduced this mixed number to an improper fraction, and then divided it by 5 to get each one s share; what was the result? 23. How much would have been each one s share, if there had been 4 of a yard of the twine 1 24. How much if there had been 1-fe? 25. Their father stood by observing them as they made their calculation, and he noticed that it so happened that they could divide their fraction by dividing the numerator. Wishing to see whether they would remember how to...
