This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2010 in the subject Politics - International Politics - Region: Eastern Europe, grade: 9 out of 10, Maastricht University (Faculty of Arts and Social Sciences), course: Module D - Traid and Aid - European Studies, Specialisation in International Politics of the European Union, language: English, abstract: Energy security is a topic with growing importance on the global political agendas. Within the European Union (EU) the consideration of supply security is of particular significance as the member states depend on outside sources, meaning principally oil and gas, to satisfy their need of energy. The EU-27 was dependent on oil imports on 82.6% and on gas imports on 60.3% in 2007. Own resources are not sufficient and in the present days the EU merely covers 46.9% of the energy consumption by its own means. When the current trends proceed the EU will be dependent on 90% for oil, 70% for gas and 100% for coal in years 2030-40. Therefore, the role of producer countries becomes increasingly important, especially regarding Russia as it is the biggest...
